F. AIRCRAFT FLIGHT MAINTENANCE REPORT (AFMR) ✓

1. The Aircraft Flight Maintenance Report (AFMR) initiated by ~~OSA~~ *this office* during the past year, is the prime method for reporting of all U-2 system malfunctions to Project Headquarters via a standard simplified message format. It supplies detailed data inputs for computer processing and continuing technical analysis of specific system reliability for all systems flown. Use of the AFMR has greatly simplified and made possible an accurate and reliable trend analysis of the U-2 systems failures.

2. The rapid and efficient recognition of system problem areas has enabled action by management and engineering to anticipate potential problem ~~areas~~ and initiate corrective action prior to their becoming critical. The system has improved schedule effectiveness by approximately 30%. This results in a net increase of one operational aircraft for mission accomplishment.
